DETAILED ACTION

This office action is in response to the amendment of July 1, 2005. In making the below rejections the examiner has considered and addressed each of the applicants arguments.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gergets et al in view of Behnke et al and Jezek as set forth in the first office action.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gergets et al in view of Behnke et al and Jezek as applied to claim 5 above, and further in view of Nguyen et al as set forth in the first office action.

Response to Arguments

Applicant's arguments filed July 1, 2005 have been fully considered but they are not persuasive. The applicant argues that the types of fluids which have been traditionally been pumped by centrifugal pumps (which are non-positive displacement pump) and positive displacement pumps are different and therefore one of ordinary skill would not be able to apply the teachings of a magnetic coupling arrangement from one type of magnetically driven pump to another type of magnetically driven pump.

Application/Control Number: 10/721,965 Page 3

Art Unit: 3746

The examiner disagrees. Respectfully, it is the examiner's position that the applicant is taking a very limited view of the teachings of the applied references.

Gergets et al, Behnke et al and Nguyen et al all set forth that it is advantageous to divert fluid from the pumping cavity back to the interior of the can of the magnetic coupling in order to improve conditions within the can. They also note that the diameters and dimensions of the passages which go thru the pump flange must be sized correctly to create the proper flow conditions. One of ordinary skill in the art would be able to apply the teachings from each of the references to the other references with regards to properly sizing the passages or the orifices which are present in them in order to create the most efficient conditions for a given application and type of pump. It is the examiners position that the types of pumps are not so different or diverse that one of ordinary skill in the pump art having teachings of passing fluid thru the cans of each type, which have the flow paths geometry and flow conditions properly designed, would not be able to apply the teachings from one reference to the other.

Further, the examiner notes that the claims do not set forth the types of fluid which are to be pumped by the positive displacement pump. Making the applicants argument that the types of fluids typically handled by the various two of pumps create an impediment to applying the teachings from one type of pump to the other even less persuasive.

Application/Control Number: 10/721,965

Art Unit: 3746

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles G. Freay whose telephone number is 571-272-4827. The examiner can normally be reached on Monday through Friday 8:30 A.M. to 5:30 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Thorpe can be reached on 571-272-4444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
